# Marco D. Visser

## PhD candidate at Radboud University Nijmegen

## Research experience

Since 2011	PhD candidate (Apr 2011 - present) at the Department of
	Experimental Plant Ecology, Radboud University Nijmegen (The
	Netherlands).

Predoctoral Fellow (Apr 2010 - present) at the Smithsonian Tropical

Research Institute, Gamboa (Panama).

Junior researcher (Sept 2009 - Feb 2010) at the Department of 2009 - 2010 Experimental Plant Ecology, Radboud University Nijmegen (The

Netherlands).

Short-term Fellow (Oct 2008 - Feb 2009) at the Smithsonian Tropical 2008-2009

Research Institute, Barro Colorado Island (Panama). MSc. Thesis research (2008-2009) at the Forest Ecology and Forest

Management Group, Wageningen University and Smithsonian Tropical Research Institute, Barro Colorado Island, Panama.

MSc. Thesis research (2008-2009) at the unit Mathematical and

Statistical Methods (Biometris) of Wageningen University. B.A. Thesis research (2007) at the Forest Research Institute Malaysia,

2007 Pasoh Forest Reserve, Malaysia for Larenstein College.

Internship (2005) at the Forest Research Institute Malaysia, Kepong, 2005

Malavsia.

2004 Internship (2004) at the Mammal Research Institute, Polish Academy

of Sciences, Bialowieza, Poland.

Volunteer (2003) at the Mammal Research Institute, Polish Academy 2003

of Sciences, Bialowieza, Poland.

## **Education**

Wageningen University and research centre, M.Sc. (cum laude, September, highest distinction at WU). Forestry and Nature Conservation, with a 2009

minor in Mathematics and Statistical Methods.

September, Larenstein University of Applied Sciences, B.A. Forestry and Nature

Conservation, with specialization in Tropical Forestry. 2007

## Publications (inc. submitted/ in preparation)

2011 1. M. D. Visser, E. Jongejans, M. van Breugel, P. A. Zuidema, Y. Chen, A. R. Kassim, H. de Kroon. 2011. Strict mast fruiting for a tropical dipterocarp tree: A demographic cost-benefit analysis of delayed reproduction and seed predation. Journal of Ecology. 99,

1033-1044.

2. M. D. Visser, S. Joseph Wright, Helene C. Muller-Landau, Gemma Rutten and Patrick A. Jansen. Tri-trophic interactions affect density dependence of seed fate in a tropical forest palm. 2011, Ecology

Letters. 14, 1093-1100.

3. B. van Putten, M. D. Visser, P. A. Jansen and H. C. Muller-Landau. 2012 Distorted- distance models for directional dispersal: a general framework and its application to a wind-dispersed tropical forest

trees. Methods in Ecology and Evolution. 2012.

4. B. T. Hirsch, M. D. Visser, R. Kays and P. A. Jansen. Quantifying seed dispersal kernels from truncated seed-tracking data. Methods in Ecology and Evolution. 2012

5. M. D. Visser. aprof: Amdahl's profiler, directed optimization made 2013 easy. R package version 0.1 - 0.2.5. http://cran.r-

project.org/web/packages/aprof/index.html. 2013.

6. P. A. Jansen, M. D. Visser, S. J. Wright, G. Rutten, H. C. Muller-2014 Landau. Negative density-dependence of seed dispersal and seedling recruitment in a Neotropical palm. Ecology Letters 17: 1111-1120.

7. M. D. Visser, S. M. McMahon, C. Merow, P. M. Dixon, S. Record 2015 and E. Jongejans. Speeding Up Ecological and Evolutionary Computations in R; Essentials of High Performance Computing for

Biologists. PLoS Comput Biol 11(3): e1004140.

doi:10.1371/journal.pcbi.1004140. 2015. 8. M. D. Visser, M. Bruijning, S. J. Wright, H. C. Muller-Landau, E.

Jongejans, L. S. Comita and H. de Kroon. Functional traits as predictors of vital rates across the life-cycle of tropical trees. Minor revision. Functional Ecology.

9. M. Bruijning, M. D. Visser, H. C. Muller-Landau, S. J. Wright, L. S. Comita, S. P. Hubbell, H. de Kroon, E. Jongejans. Surviving in a cosexual world: a cost-benefit analysis of dioecy in tropical trees.

Major revision. American Naturalist.

10. M. D. Visser, S. Joseph Wright, Helene C. Muller-Landau, Eelke In prep Jongejans, Liza S. Comita, Hans de Kroon and Stefan Schnitzer. Differential effects of lianas on population growth rates of tropical

forest trees. In prep.

11. M. D. Visser, H. C. Muller-Landau, S. J. Wright, J. Svenning, P. A. Jansen. Seasonal aggregation of generalist seed predators around preferred fruit trees: consequences for negative density-dependence of seed survival. In preparation for Ecology.

# About my research

2015 - Salguero-Gómez, R (2015). Demography to infinity and beyond! Journal of Ecology blog.

#### **Grants and awards**

- **Grant**: NWO-ALW, What maintains the diversity of tropical tree species? Unravelling the importance of niche and neutrality with a life cycle approach. Co-wrote with Hans de Kroon, Helene Muller-Landau, Eelke Jongejans, S. J. Wright, P.A. Zuidema, P.A. Jansen and S. Tuljapurkar (230k). 2011.
- Award: WUF-KLV thesis prize for the best thesis in the life sciences from Wageningen University awarded for my MSc thesis: Density-dependent dispersal and seed predation in a Neotropical palm. 2009.
- **Grant**: Smithsonian Tropical Research Institute, short term fellowship awarded for the study: Quantifying density-dependent responses of seed predators in the Neotropical palm Attalea butyracea. (\$ 5k). 2008.

#### International presentations

- Workshop at the at the British Ecological Society Symposium
   "Demography Beyond The Population". March 2015, Sheffield.
   Speeding Up Ecological and Evolutionary Computations in R; Essentials of High Performance Computing for Biologists.
  - **Speaker** at the British Ecological Society Symposium "Demography Beyond The Population". March 2015, Sheffield. Differential effects of lianas on population growth rates of tropical forest trees.
- 2014 **Short Workshop** at the Yale School of Forestry & Environmental Studies. December 2014, New Haven. Speeding Up Ecological and Evolutionary Computations in R; Essentials of High Performance Computing for Biologists.
- Invited speaker at the conference "Everything disperses to Miami",
  December 14 December 16, 2012, the University of Miami. The
  fitness consequences of dispersal for a tropical palm; the role of
  dispersers, natural enemies and negative density dependence.
  Invited speaker at the Max Planck Intitute for Demographic
  Research, workshop on Integral Projection Models, Rostock Germany.
  June 2012. A Blueprint for speeding-up calculations in R.
  - **Oral presentation** at the Netherlands Annual Ecology Meeting. February 2012. Quantifying dispersal kernels through inverse modeling.
- 2010 **Oral presentation** at the Smithsonian Tropical Research Institute. Panama. August 2010. Density-dependence in a Neotropical palm: the role of dispersal, seed predation and trophic interactions.

  Invited speaker at the 5th International Symposium-Workshop on Frugivores and Seed Dispersal. Montpellier, France. June 2010.
  - Measuring dispersal kernels through inverse modeling: density dependence of seed dispersal in a Neotropical palm. **Speaker** at Plant Population Biology: Crossing Borders. Gfoconference, Nijmegen, Netherlands. May 2010. Strict mast fruiting for
- a tropical dipterocarp tree: a demographic cost-benefit analysis

  Oral presentation at the Smithsonian Tropical Research Institute.

  Panama. December 2009. Density-dependent dispersal and seed
- predation in a Neotropical palm.

  Oral presentation at the workshop on stochastic elasticity and matrix modeling. Nijmegen, the Netherlands, June 2008. Strict masting in the tropical tree species Shorea legrosula: demographic
- masting in the tropical tree species Shorea leprosula: demographic consequences and evolutionary benefit of predator satiation.

  Oral presentation at the International workshop in Matrix models of
  - plant populations. Sogndal, Norway, June 2007. Demographic consequences of strict masting for two tropical tree species Shorea leprosula and Shorea parvifolia.

## **Reviewer for scientific journals**

Biotropica, Canadian Journal of Forest Research, Ecology, Ecology and Evolution, Ecology Letters, Journal of Biogeography, Journal of Ecology, Methods in Ecology and Evolution, PLOS computational biology, The R Journal.
